

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Complete Developer Handoff Recommendation

1. Executive Summary

The enhancement should transform MyLeaseAudit into an AI-assisted lease audit platform while preserving the existing MyLeaseAudit audit workflow.

The current user guide already establishes Audits as the primary workspace and supports stages, substages, documents, notes, actions, appointments, activities, records, contacts, comments, audit window notifications, audit timespan notifications, stage movement, and LASS reporting. The new functionality should extend this structure rather than replace it.

The enhancement should support:

1. AI lease extraction.
2. AI CAM / operating expense statement extraction.
3. Lease-CAM validation.
4. Auditor findings and observations.
5. Stage-specific checklist readiness.
6. Approval workflow for stage advancement.
7. Savings recording and tracking.
8. Year-specific Audit Findings Reports.
9. Audit-level final reporting.
10. Dashboard and LASS rollups.

2. Core Architecture

2.1 Correct Hierarchy

The system must distinguish between:

Audit-level records

and

Audit-year-specific records

Recommended structure:

Audit

└─ Audit Year 2022

└─ Audit Year 2023

MyLeaseAudit AI Enhancement – Approval Form Process and Related

└— Audit Year 2024

└— Audit Year 2025

Each **Audit Year** should own:

Validation Findings

Findings & Observations

Checklist Items

Approval Requests

Savings Records

Audit Findings Reports

Year-Specific Output Artifacts

The overall **Audit** should own:

Documents

Contacts

Records

Activities

Appointments

Comments

Audit-Level Executive Summary

Final Audit Report

LASS / Management Reporting

Archive Status

3. Final Audit Workspace

3.1 Preserve Existing Sections

Keep the existing audit workspace sections:

Documents

Document Notes

Actions

Appointments

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Activities

Records

Contacts

Comments

3.2 Add Five New Tabs

Add only these five new tabs:

1. Validation
2. Findings & Observations
3. Checklist
4. Approvals
5. Savings

Do **not** create permanent tabs for:

PIRL

IRL

Schedule A/B

ARL

COFR

PR

Audit Findings Report

Those are workflow artifacts, stages, or generated outputs.

4. Audit Workspace Wireframe

AUDIT HEADER						
Tracking ID	Client	Property	Lease ID	Current Stage	Auditor	QC
Audit Years: [2022]		[2023]		[2024]		
Active Year: [2023 ▼]						
Audit Window Status		Audit Timespan Status		Priority Rank		

MyLeaseAudit AI Enhancement – Approval Form Process and Related

[Move Stage] [Request Approval] [Generate Output] [Archive]

Documents | Validation | Findings & Observations | Checklist | Approvals | Savings | Records | Activities | Actions | Contacts | Comments

SELECTED TAB CONTENT

If selected tab is year-specific, data refreshes based on Active Year.

5. Audit Year UX Behavior

5.1 Active Year Selector

The audit header must include an **Active Year** selector.

Example:

Audit Years: 2022 | 2023 | 2024

Active Year: 2023

Changing Active Year refreshes:

Validation

Findings & Observations

Checklist

Approvals

Savings

Audit Findings Report generation

without leaving the audit file.

5.2 Year-Specific Tabs

These tabs must be filtered by Active Year:

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Validation

Findings & Observations

Checklist

Approvals

Savings

5.3 Audit-Level Tabs

These sections may show all years or audit-level data:

Documents

Records

Activities

Actions

Contacts

Comments

Appointments

5.4 UX Rule

The user should always know:

Which audit am I in?

Which audit year am I reviewing?

What stage is this year in?

What is blocking this year from moving forward?

6. Tab 1: Validation

6.1 Purpose

Validation answers:

What did the system find?

It is an AI and rules-engine area. It should not contain final audit conclusions.

6.2 Validation Inputs

Validation should compare:

AI-extracted lease terms

MyLeaseAudit AI Enhancement – Approval Form Process and Related

AI-extracted CAM statement data

TRS data

PES data

Lease amendments

Expense matrix

Statement support

Cap rules

Gross-up rules

Base year / expense stop rules

Audit window rules

Audit timespan rules

Prior-year data

6.3 Validation Wireframe

VALIDATION SUMMARY — AUDIT YEAR 2023	
Status: Completed Findings: 37 Critical: 5 Est. Exposure: \$142,500	
[Run Validation] [Re-run AI Extraction] [Export Validation Log]	

FILTERS		VALIDATION FINDINGS GRID		FINDING DETAIL DRAWER	
Category	ID	Issue	Severity	Confidence	Finding Summary
Severity	Checklist Impact		Stage Impact	AI Explanation	
Confidence	Status	Linked Observation		Lease Clause	
Status	Est. Exposure	Statement Line	Statement Line		
Stage Impact		Evidence Links			
	Checklist Impact				

MyLeaseAudit AI Enhancement – Approval Form Process and Related

	[Create Observation]	
--	----------------------	--

6.4 Validation Finding Fields

Field	Type	Required Notes	
validation_id	System ID	Yes	Auto-generated
audit_id	Foreign key	Yes	Parent audit
audit_year_id	Foreign key	Yes	Required
source_document_id	Foreign key	Yes	Lease, statement, support document
category	Dropdown	Yes	Lease-CAM Conflict, Timing, Data Quality, Analytical
issue_type	Dropdown	Yes	Cap, Gross-Up, Excluded Expense, Missing Support, etc.
severity	Dropdown	Yes	Critical, High, Medium, Low
ai_confidence	Percentage	Yes	0–100
finding_summary	Short text	Yes	Short issue statement
ai_explanation	Long text	Yes	System explanation
lease_clause_reference	Text / link	Optional	Clause, section, page
statement_line_reference	Text / link	Optional	Statement line
estimated_exposure	Currency	Optional	Preliminary amount
checklist_impact	Dropdown	Yes	Blocking, Review Required, Informational
stage_impact	Dropdown	Yes	Stage 1–6 or None
status	Dropdown	Yes	Open, Under Review, Converted to Observation, Closed
linked_observation_id	Foreign key	Optional	Populated when observation is created
created_by	System/User	Yes	Usually AI/System
created_at	DateTime	Yes	Auto

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Field	Type	Required	Notes
last_reviewed_by	User	Optional	Auditor
last_reviewed_at	DateTime	Optional	Auto

6.5 Validation Workflow

1. Lease and statement are uploaded.
2. AI extraction runs.
3. Validation engine compares lease terms against statement data.
4. Validation findings are created for the selected audit year.
5. Auditor reviews findings.
6. Auditor may:
 - Close as informational
 - Mark under review
 - Create observation
7. If observation is created, validation finding remains linked but unchanged.
8. Checklist uses validation review status as evidence.

6.6 Developer Rule

Validation findings are immutable. Store auditor actions in status history rather than overwriting the AI result.

7. Tab 2: Findings & Observations

7.1 Purpose

Findings & Observations is the auditor's primary workpaper area.

It answers:

What did the auditor conclude?

This tab bridges validation, PIRL, IRL, Schedule A/B, ARL, COFR, savings, and reporting.

7.2 Important Design Rule

PIRL, IRL, ARL, COFR, PR, and Schedule A/B should be linked audit artifacts, not separate tabs.

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Example:

Observation

- └─ Linked Validation Finding
- └─ Linked PIRL Request
- └─ Linked IRL Response
- └─ Linked Schedule A/B Item
- └─ Linked ARL Item
- └─ Linked COFR Item
- └─ Linked Savings Record
- └─ Linked Audit Findings Report

7.3 Findings & Observations Wireframe

FINDINGS & OBSERVATIONS — AUDIT YEAR 2023	
Open: 12 Under Review: 8 Confirmed: 6 Reportable: 4 Closed: 10	
Potential Savings: \$125,000 Linked Savings Records: 7	
[New Observation] [Create from Validation] [Bulk Update]	

FILTERS		OBSERVATIONS / FINDINGS GRID				DETAIL DRAWER

Severity	Savings Reportable Assigned To	Evidence Links					
Type	Checklist Impact Last Updated	PIRL / IRL Links					
Reportable		Checklist Impact					
Savings		Savings Link					

MyLeaseAudit AI Enhancement – Approval Form Process and Related

7.4 Observation / Finding Fields

Field	Type	Required	Notes
observation_id	System ID	Yes	Auto-generated
audit_id	Foreign key	Yes	Parent audit
audit_year_id	Foreign key	Yes	Required
source_type	Dropdown	Yes	Validation, Manual, PIRL, IRL, Schedule A/B, ARL, COFR, PR
source_record_id	Foreign key	Optional	Source object
title	Short text	Yes	Finding title
description	Long text	Yes	Auditor description
classification	Dropdown	Yes	Potential Overcharge, Lease Violation, Calculation Error, Documentation Deficiency, Timing Issue, Savings Opportunity, Information Only
severity	Dropdown	Yes	Critical, High, Medium, Low
status	Dropdown	Yes	Open, Under Review, Confirmed, Rejected, Included in Report, Presented, Resolved, Closed
created_stage	Dropdown	Yes	Stage where created
current_stage	Dropdown	Yes	Current audit stage
expected_resolution_stage	Dropdown	Optional	COFR, PR, Closure, etc.

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Field	Type	Required Notes	
assigned_to	User	Optional	Auditor, QC, PM
lease_clause_link	Link / foreign key	Optional	Evidence
statement_line_link	Link / foreign key	Optional	Evidence
supporting_documents	Multi-link	Optional	Files
pirl_link	Foreign key	Optional	PIRL request/response
irl_link	Foreign key	Optional	IRL request/response
schedule_ab_link	Foreign key	Optional	Schedule A/B
arl_link	Foreign key	Optional	ARL artifact
cofr_link	Foreign key	Optional	COFR artifact
estimated_exposure	Currency	Optional	Before savings creation
potential_savings	Currency	Optional	Can create savings record
include_in_audit_findings_report	Boolean	Yes	Default false
landlord_facing_narrative	Long text	Optional	Used in report
internal_notes	Long text	Optional	Never included in reports by default
checklist_impact	Dropdown	Yes	Blocking, Evidence, Informational
created_by	User	Yes	Auto
created_at	DateTime	Yes	Auto
updated_by	User	Yes	Auto
updated_at	DateTime	Yes	Auto

7.5 Observation Status Lifecycle

Use this standardized lifecycle:

Open

↓

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Under Review

Confirmed / Rejected

Included in Report

Presented

Resolved

Closed

A **Confirmed** observation is treated as a finding. Do not create a separate Finding entity unless required later.

7.6 Observation-to-Savings Rule

One observation may produce:

0..N Savings Records

Example:

Observation: Management Fee Overcharge

├— 2022 Savings Record

├— 2023 Savings Record

└— 2024 Savings Record

However, each savings record must belong to one audit year.

8. Tab 3: Checklist

8.1 Purpose

The Checklist tab is the stage readiness and audit quality-control center.

It answers:

Can this audit year move forward?

MyLeaseAudit AI Enhancement – Approval Form Process and Related

8.2 One Checklist Tab

There should be one Checklist tab.

Inside the tab:

Lifecycle navigator

Expandable stage sections

Evidence panel

Readiness summary

8.3 Checklist Wireframe

CHECKLIST / STAGE READINESS — AUDIT YEAR 2023		
Current Stage: Schedule A/B Review		
Completion: 84% Required Complete: 19/22 Blocking Items: 3		
Ready for Advancement: NO		

AUDIT LIFECYCLE	ACTIVE STAGE CHECKLIST
✓ Stage 1 IFR ▼ Stage 3 - Schedule A/B	
✓ Stage 2 PIRL / IRL	✓ Validation Findings Reviewed
► Stage 3 Sch A/B	✓ Findings Updated
○ Stage 4 ARL	✓ Potential Savings Calculated
○ Stage 5 COFR/PR/AR	□ Exposure Approved
○ Stage 6 Closure	□ QC Review Completed
	□ Reportable Findings Confirmed

MyLeaseAudit AI Enhancement – Approval Form Process and Related

EVIDENCE PANEL	
Selected Item: QC Review Completed	
Required Reviewer: QC Manager	
Evidence Required: Confirmed Findings + Exposure Calculation	
Related Observations: OBS-14, OBS-22	
Related Documents: Schedule A/B, Support Package	
[Mark Complete] [Request QC Review] [View Evidence]	

8.4 Checklist Item Fields

Field	Type	Required	Notes
checklist_item_id	System ID	Yes	Auto
audit_id	Foreign key	Yes	Parent audit
audit_year_id	Foreign key	Yes	Required
stage	Dropdown	Yes	Stage 1–6
substage	Dropdown	Optional	PIRL Sent, ARL Review, etc.
category	Dropdown	Yes	Documents, AI Review, Validation, Findings, Requests, Financial Review, Approvals, Closure
item_title	Short text	Yes	Checklist label
item_description	Long text	Optional	Guidance
required	Boolean	Yes	Blocks advancement if incomplete
completion_method	Dropdown	Yes	Automatic, Manual, Hybrid
status	Dropdown	Yes	Not Started, In Progress, Complete, Approved, Waived
blocking	Boolean	Yes	Derived

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Field	Type	Required	Notes
evidence_type	Multi-select	Yes	Document, Validation, Observation, Savings, Approval, Report
evidence_record_ids	Multi-link	Conditional	Required if evidence-based
required_role	Dropdown	Optional	Auditor, QC, PM, Admin
completed_by	User	Optional	Auto
completed_at	DateTime	Optional	Auto
approved_by	User	Optional	If approval required
waived_reason	Long text	Conditional	Required if waived
comments	Long text	Optional	Reviewer notes

8.5 Checklist Workflow

1. Audit year enters Stage 1.
2. Stage 1 checklist is instantiated from template.
3. System auto-completes objective evidence items.
4. Auditor completes manual/hybrid items.
5. Required incomplete items block advancement.
6. When all required items are complete, Ready for Advancement = YES.
7. Approval request becomes available.
8. Once approved, stage advances.
9. Completed stage checklist becomes locked/read-only.
10. Next stage checklist activates automatically.

9. Tab 4: Approvals

9.1 Purpose

The Approvals tab manages formal approval for stage advancement and selected high-impact actions.

It answers:

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Who approved this audit year to move forward?

9.2 Approval Wireframe

APPROVAL SUMMARY — AUDIT YEAR 2023			
Pending: 1 Approved: 4 Rejected: 1 Current Stage Ready: YES			
[Create Approval Request]			

APPROVAL REQUESTS GRID		APPROVAL DETAIL		
ID	From Stage	To Stage	Status	Request Summary
Requested By		Requested Date	Checklist Snapshot	
Approver	Decision Date	Validation Summary		
	Findings Summary			
	Savings Summary			
	Supporting Documents			
	[Approve] [Reject] [Return]			

9.3 Approval Fields

Field	Type	Required	Notes
approval_id	System ID	Yes	Auto
audit_id	Foreign key	Yes	Parent audit
audit_year_id	Foreign key	Yes	Required for stage advancement
request_type	Dropdown	Yes	Stage Advancement, Report Approval, Savings Approval

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Field	Type	Required	Notes
from_stage	Dropdown	Yes	Current stage
to_stage	Dropdown	Conditional	Required for stage movement
requested_by	User	Yes	Auto
requested_at	DateTime	Yes	Auto
approver	User / group	Yes	Role-based
approval_status	Dropdown	Yes	Draft, Submitted, Approved, Rejected, Returned, Cancelled
checklist_snapshot	JSON / reference	Yes	Snapshot at submission
validation_summary	JSON / reference	Yes	Snapshot
findings_summary	JSON / reference	Yes	Snapshot
savings_summary	JSON / reference	Yes	Snapshot
supporting_documents	Multi-link	Optional	Evidence
requester_comments	Long text	Optional	
approver_decision	Dropdown	Conditional	Approve, Reject, Return
approver_comments	Long text	Conditional	Required if reject/return
decision_at	DateTime	Optional	Auto
stage_movement_enabled	Boolean	Yes	Derived

9.4 Approval Workflow

1. Checklist reaches Ready for Advancement = YES.
2. Auditor clicks Request Approval.
3. System creates approval package for the active audit year.
4. Approver receives notification.

MyLeaseAudit AI Enhancement – Approval Form Process and Related

- 5. Approver reviews checklist, findings, savings, and evidence.
- 6. Approver approves, rejects, or returns.
- 7. If approved, stage movement is enabled.
- 8. If rejected/returned, audit year remains in current stage.
- 9. Approval history remains permanent.

10. Tab 5: Savings

10.1 Purpose

The Savings tab is the system of record for savings.

Savings should usually originate from confirmed findings but must be recorded and maintained in the Savings tab.

10.2 Savings Wireframe

SAVINGS SUMMARY — AUDIT YEAR 2023		
Potential: \$125,000 Agreed: \$90,000 Collected: \$75,000		
Subsequent Period: \$210,000		
Audit Total Across Years: \$315,000		
[New Savings Record] [Export Savings]		

SAVINGS LEDGER				SAVINGS DETAIL		
ID	Type	Status	Amount	Source Finding		
Source		Cost Category	Year	Lease Clause		
Agreed Date		Collected Date		Statement Line		
			Savings Lifecycle			
			Supporting Documents			

MyLeaseAudit AI Enhancement – Approval Form Process and Related

	[Update Status] [Attach Proof]	
--	--------------------------------	--

10.3 Savings Fields

Field	Type	Required	Notes
savings_id	System ID	Yes	Auto
audit_id	Foreign key	Yes	Parent audit
audit_year_id	Foreign key	Yes	Required
source_observation_id	Foreign key	Recommended	Preferred source
source_validation_id	Foreign key	Optional	Indirect link
title	Short text	Yes	Savings title
savings_type	Dropdown	Yes	Potential, Agreed, Collected, Subsequent Period
savings_status	Dropdown	Yes	Draft, Potential, Submitted, Agreed, Disputed, Collected, Written Off, Closed
amount	Currency	Yes	Current amount
currency	Dropdown	Yes	Default from audit/location
cost_category	Dropdown	Yes	Existing cost categories
statement_line_link	Foreign key / link	Optional	
lease_clause_link	Foreign key / link	Optional	
calculation_method	Long text	Optional	
calculation_attachment	File/link	Optional	
agreed_amount	Currency	Optional	
collected_amount	Currency	Optional	

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Field	Type	Required	Notes
identified_date	Date	Yes	
agreed_date	Date	Optional	
collected_date	Date	Optional	
collection_method	Dropdown	Optional	Check, Wire, Credit, Offset, Invoice Adjustment
supporting_documents	Multi-link	Optional	COFR, PR, audit report, proof of payment
subsequent_period_flag	Boolean	Yes	
subsequent_period_description	Long text	Conditional	Required if flag true
created_by	User	Yes	Auto
created_at	DateTime	Yes	Auto
updated_by	User	Yes	Auto
updated_at	DateTime	Yes	Auto

10.4 Savings Rollup Rules

Savings must support both year-specific and audit-level totals.

Year-specific totals

2023 Potential Savings

2023 Agreed Savings

2023 Collected Savings

2023 Subsequent Period Savings

Audit-level totals

Total Potential Savings across all years

Total Agreed Savings across all years

Total Collected Savings across all years

Total Subsequent Period Savings across all years

Rule

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Do not double count the same savings record across statuses. The system should treat the savings lifecycle as progression of the same record unless a separate recovery item is intentionally created.

11. Audit Artifacts vs Reports

11.1 Audit Artifacts

Audit artifacts are workflow objects used during the audit process.

Examples:

PIRL

IRL

ARL

COFR

Process Request

Schedule A/B

These are not primary report types.

They should be linked to Findings & Observations.

11.2 Reports / Outputs

Reports are generated deliverables intended for presentation, distribution, or formal storage.

Examples:

Audit Findings Report

Final Audit Report

Executive Summary

Savings Summary

LASS Report

12. Audit Findings Report

12.1 Correct Architecture

The Audit Findings Report is **year-specific**.

Correct structure:

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Audit

- └─ Audit Year
 - └─ Audit Findings Report

Example:

Audit: ABC Plaza

- └─ 2022 Audit Findings Report
- └─ 2023 Audit Findings Report
- └─ 2024 Audit Findings Report

Each Audit Findings Report contains only findings for that audit year.

12.2 Where the Audit Findings Report Lives

Do not create an Audit Findings Report tab.

Use:

Audit Header → Generate Output

Generated reports should be stored in:

Documents

and linked back to included findings and savings.

12.3 Generate Output Wireframe

GENERATE OUTPUT	
Output Type: [Audit Findings Report ▼]	
Audit Year: [2023 ▼]	
Audience: [Landlord ▼]	
Format: [PDF ▼][Word ▼][Excel ▼]	
Template: [Standard Landlord Findings Report ▼]	

MyLeaseAudit AI Enhancement – Approval Form Process and Related

AVAILABLE REPORTABLE FINDINGS	REPORT PREVIEW
☒ OBS-14 Management Fee Overcharge	Audit Findings Report
☒ OBS-22 Gross-Up Error	Audit Year: 2023
☐ OBS-31 Tax Allocation Issue	Finding 1
☒ OBS-35 Capital Expense Issue	Lease Reference
	Statement Reference
	Requested Adjustment
	Potential Savings

OUTPUT OPTIONS
☒ Include Lease Clause References
☒ Include Statement Line References
☒ Include Savings Summary
☐ Include Internal Notes
☒ Create Document Record After Generation
[Generate Draft] [Request Approval] [Finalize Output]

12.4 Audit Findings Report Fields

Field	Type	Required Notes	
report_id	System ID	Yes	Auto
report_number	Text/System	Yes	Example: AFR-2023-001
audit_id	Foreign key	Yes	Parent audit
audit_year_id	Foreign key	Yes	Required

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Field	Type	Required Notes	
output_type	Dropdown	Yes	Audit Findings Report
audience	Dropdown	Yes	Landlord, Client, Internal
template_id	Foreign key	Yes	Template library
selected_observations	Multi-link	Yes	Confirmed findings only
selected_savings	Multi-link	Optional	Year-specific savings
include_lease_references	Boolean	Yes	
include_statement_references	Boolean	Yes	
include_savings_summary	Boolean	Yes	
include_internal_notes	Boolean	Yes	Default false
output_status	Dropdown	Yes	Draft, Pending Approval, Approved, Released, Archived
generated_file_id	Foreign key	Optional	Link to Documents
format	Dropdown	Yes	PDF, DOCX, XLSX
requested_by	User	Yes	
generated_by	User/System	Yes	
generated_at	DateTime	Yes	
approved_by	User	Optional	
approved_at	DateTime	Optional	
released_by	User	Optional	
released_at	DateTime	Optional	
version_number	Number	Yes	

12.5 Report Approval Lifecycle

Audit Findings Reports should follow this lifecycle:

Draft

MyLeaseAudit AI Enhancement – Approval Form Process and Related

↓

Pending Approval

↓

Approved

↓

Released

↓

Archived

Reports should not be released to landlord until approved.

12.6 Audit Findings Report Content

Recommended sections:

1. Cover / Header

- Client
- Property
- Tracking ID
- Audit Year
- Report Date

2. Executive Summary

- Number of findings
- Total potential savings
- Main finding categories

3. Findings Detail

- Finding title
- Description
- Lease reference
- Statement reference

MyLeaseAudit AI Enhancement – Approval Form Process and Related

- Auditor conclusion
- Requested adjustment / requested response

4. Savings Summary

- Potential savings by finding
- Total potential savings

5. Supporting Reference List

- Lease clauses
- Statement lines
- Supporting documents

6. Next Steps

- Requested landlord response
- Due date
- Contact information

Internal notes must be excluded by default.

12.7 Audit Findings Report Workflow

1. Auditor confirms observations as findings.
2. Auditor marks selected findings as Include in Audit Findings Report.
3. User clicks Generate Output.
4. User selects Audit Findings Report.
5. User selects audit year.
6. System displays only confirmed, reportable findings for that year.
7. User selects findings to include.
8. System generates draft.
9. Draft is routed for approval.
10. Approved report is finalized.

MyLeaseAudit AI Enhancement – Approval Form Process and Related

11. Final report is stored in Documents.
12. Included findings are updated to Included in Report.
13. When report is released to landlord, findings are updated to Presented.
14. Landlord response updates findings and savings.

13. Other Generated Outputs

13.1 Year-Specific Outputs

Require audit year selection:

Audit Findings Report

Year-Specific Savings Summary

13.2 Audit-Level Outputs

May combine multiple years:

Final Audit Report

Executive Summary

LASS Report

Portfolio / Management Summary

13.3 Generate Output Menu

Generate Output

└─ Audit Findings Report

└─ Final Audit Report

└─ Executive Summary

└─ Savings Summary

└─ LASS Report

Do not include ARL, PIRL, IRL, COFR, or PR as generic report types.

14. Role and Permission Matrix

Function	Auditor QC Reviewer Project Manager Admin			
View audit file	Yes	Yes	Yes	Yes

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Manage report templates	No	No	Limited	Yes
Override stage gate	No	No	Limited with reason	Yes with reason

15. Dashboard Requirements

15.1 Audit Dashboard

Display for each audit:

Open Validation Findings

Open Observations

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Confirmed Findings

Blocking Checklist Items

Pending Approvals

Potential Savings

Agreed Savings

Collected Savings

Reports Pending Approval

15.2 Management Dashboard

Display across audits:

Total Potential Savings

Total Agreed Savings

Total Collected Savings

Total Subsequent Period Savings

Savings by Client

Savings by Auditor

Savings by Year

Savings by Stage

15.3 Quality Dashboard

Display:

Findings Aging

Validation-to-Observation Conversion Rate

Rejected Findings Rate

Approval Turnaround Time

Stage Bottlenecks

Checklist Completion Delays

Reports Pending Approval

16. End-to-End Workflow

1. Audit is started from a location.

MyLeaseAudit AI Enhancement – Approval Form Process and Related

2. One or more audit years are selected.
3. Lease and statement documents are uploaded.
4. AI extracts lease terms and statement data.
5. Validation findings are generated by audit year.
6. Auditor reviews validation findings.
7. Auditor creates observations from selected findings.
8. Auditor links PIRL / IRL requests and responses as needed.
9. Auditor confirms or rejects observations.
10. Confirmed findings may create savings records.
11. Checklist verifies required work for the active audit year and stage.
12. Approval request is submitted when checklist is complete.
13. Approver reviews checklist, findings, savings, and evidence.
14. Approved audit year advances to next stage.
15. Reportable findings are selected for Audit Findings Report.
16. User generates year-specific Audit Findings Report.
17. Draft report is routed for approval.
18. Approved report is released.
19. Generated report is stored in Documents and linked to included findings.
20. Landlord response updates findings and savings.
21. Agreed and collected savings are tracked in Savings tab.
22. Closure checklist confirms all findings, savings, reports, and approvals.
23. Audit-level reports and LASS pull from structured records.

- └─ SavingsRecords
- └─ Document

18. Implementation Rules

18.1 Validation

Validation findings are immutable.

Auditor disposition is stored separately.

Validation creates observations but does not create final audit conclusions.

18.2 Findings & Observations

Observations are first-class records.

Every observation must belong to an audit year.

MyLeaseAudit AI Enhancement – Approval Form Process and Related

Confirmed observation = finding.

Rejected findings remain in history.

Internal notes must not appear in landlord-facing reports by default.

18.3 Checklist

One Checklist tab.

Stage-specific checklist sections.

Current stage editable.

Completed stages locked.

Required incomplete items block advancement.

Completion requires evidence where applicable.

18.4 Approvals

Approvals are tied to audit year and stage advancement.

Rejected or returned approvals require comments.

Approval packages store checklist/finding/savings snapshots.

18.5 Savings

Savings tab is the system of record.

Savings usually originate from confirmed findings.

Savings must be audit-year specific.

Potential, Agreed, Collected, and Subsequent Period savings must be separately tracked.

Audit-level rollups must aggregate year-specific savings without double counting.

18.6 Audit Findings Report

Audit Findings Reports are audit-year specific.

Report generation must require audit year selection.

Only confirmed reportable findings for that year should be available.

Generated reports must be versioned.

Generated reports must be stored in Documents.

Included findings must link back to the generated report.

Reports must require approval before release.

19. UI/UX Design Instructions

Design around these questions:

What did AI find?

What did the auditor conclude?

What is blocking stage movement?

Who approved the work?

What savings exist?

What report is ready for landlord presentation?

Use:

Persistent audit header

Active year selector

Grid + right-side detail drawer

Status badges

Lifecycle timeline

Evidence links

Readiness indicators

Report preview

Version history

Avoid:

Too many tabs

Separate PIRL/IRL tabs

Separate Audit Findings Report tab

Duplicate findings storage

Manual re-entry of savings

Mixing internal notes into landlord reports

Generating Audit Findings Reports without selecting year

20. Final Product Structure

Audit Workspace
